

MAGRUDER FERTILIZER CHECK SAMPLE PROGRAM
Subscription Application for the Period of January 1 - December 31, 20____
www.magruderchecksample.org

We request subscription for our laboratory in the Magruder Fertilizer Check Sample Program for the period of January 1 through December 31. As a subscribing laboratory, we agree to see that the analysts who assay the Magruder fertilizer samples in this laboratory are fully informed of the instructions given on the reporting form before analysis is started. Whenever possible, the analyst who usually performs a given analysis will assay the check sample.

Permission is hereby granted for publication and inclusion of these results in subsequent statistical treatments and reports by the Magruder Committee and/or its agent. We will endeavor to perform as many of the analyses as possible on each of the check samples and mail the results on the required form by the 10th of the month following receipt to:

ROBERT A. COELHO
14004 Greencroft Lane
Cockeysville, MD 21030-1108

Sample may also be e-mailed to rcoelho@comcast.net

Early mailing of the results is recommended for laboratories outside of the United to insure inclusion in the monthly statistical evaluation.

It is agreed that this laboratory will pay in advance at the rate of U.S \$204.00 per annum. (Subscribers outside of the US will be charged for postage.) We understand that our subscription will be automatically renewed each year and we will be billed the membership fee established annually by the Magruder Committee.
