3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Dark Brown Granule. Not flammable or explosive, but will decompose in extreme heat to produce toxic sulfur oxide gas and metal fume. The granular solid or dust is relatively non-toxic to humans and poses little immediate hazard to emergency response personnel, but is partially soluble in water and can pose a threat to watercourses.

CAUTION! MAY CAUSE EYE, SKIN, AND RESPIRATORY IRRITATION.

- Avoid contact with skin and clothing. Wash after handling.
- Wear appropriate personal protective equipment. (See Section 8 for additional information)

Appearance and odor: SOLID BROWN GRANULES/SLIGHT METALLIC ODOR.

Personal Protective Equipment (PPE)

- Protective Clothing: The hazard potential of this material is low. Where there is large-scale use of this material and significant potential for worker contact, gloves and long sleeved work clothes or disposable coveralls may be necessary. Eye protection should be worn where dust is generated and there is a potential that eye contact may occur.
- Ventilation: Use adequate local or general ventilation where necessary to maintain the concentrations of dust well below the recommended occupational exposure limits for general Particulates. Not Otherwise Specified (PNOS).
- Respirators: Where dust or fumes are generated and cannot be controlled to within acceptable levels by engineering means, use appropriate NIOSH-approved respiratory protection equipment (a 42CFR84 Class N, R or P-95 particulate filter cartridge).
