<b>SECTION 4</b>	<b>FIRST AID MEASURES</b>	
First Aid Procedures:	Eyes:	May cause irritation due to mechanical action. Rinse eye with water to remove dust or grit.
	Skin:	Prolonged or repeated contact may dry skin and cause irritation. Avoid contact with skin and clothing. Wash thoroughly after handling.
	Inhaled:	Move victim to fresh air. Administer oxygen if breathing is difficult.
	Ingestion:	Rinse mouth. Obtain medical attention immediately if ingested.
Note to Physician:	All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.	

<b>SECTION 5</b>	<b>FIRE FIGHTING MEASURES</b>
Extinguishing Media:	Use extinguishing agent suitable for type of surrounding fire. Avoid excessive water to minimize runoff. Prevent firefighter water from entering the environment. Small fires: Water spray, foam, dry chemical or CO <sub>2</sub> Large fires: Water spray, fog or foam
Protection of Firefighters:	Positive pressure, self-contained breathing apparatus is required.

<b>SECTION 6</b>	<b>ACCIDENTAL RELEASE MEASURES</b>
Response Techniques:	Do not walk through spilled material. Wear appropriate personal protective equipment, avoid direct contact. As an immediate precautionary measure use appropriate personal protective equipment (PPE). Carefully shovel or sweep up spilled material and place in suitable container. Avoid generating dust. Keep unauthorized personnel away.

<b>SECTION 7</b>	<b>HANDLING AND STORAGE</b>
Handling:	Use only with adequate ventilation. Minimize dust generation and accumulation. Wear appropriate personal protective equipment, avoid direct contact. Avoid breathing dust. Avoid contact with skin, eyes, and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.
Storage:	Keep container closed. Store in a dry, well-ventilated place.

<b>SECTION 8</b>	<b>EXPOSURE CONTROLS / PERSONAL PROTECTION</b>
Engineering Controls:	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is not leakage from the equipment).

Personal Protective Equipment (PPE):	Eye/Face:	Wear safety goggles.	
	Skin:	Wear appropriate gloves. Wear long sleeves and/or protective coveralls.	
	Respiratory:	For limited exposure use an N95 dust mask. For prolonged exposure use an air- purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.	
	Other:	A source of clean water should be available in the work area for flushing eyes and skin.	
General Hygiene Considerations:	Wash thoroughly after handling Use adequate ventilation		
Exposure Guidelines:	OSHA Permissible Exposure Limits (PEL):	Silica (Quartz): $\frac{10 \text{ mg} / \text{m}^3}{\% \text{SiO}_2 + 2}$	
	ACGIH Threshold Limit Value (TLV):	Silica (Quartz): 0.025 mg/m <sup>3</sup> TWA
